Warndon Parish Council SID report covering July 2023 for September Meeting

TRAFFIC ANALYSIS REPORT FOR WESTCOTEC SID

The Westcotec device has been installed on Dugdale Drive on lamppost 7920 opposite Bright Avenue for vehicles heading west since 3rd April 2023. This location has a history of a large proportion of vehicles exceeding the 30mph speed limit.

The July analysis shows a broadly similar trend to June's data. In July there was a reduced average daily count from 1,637 vehicles a day to 1,441. This may be a consequence of the work for the new pedestrian crossing on Woodgreen Drive being completed.

The Westcotec report that accompanies this Parish Report provides more detailed information regarding driver behaviour.

TRAFFIC ANALYSIS REPORT

TRAFFIC ANALYSIS REPORT FOR ELAN CITY SID

The device has been moved to Plantation Dr lp 7828 westbound, before turning Haywain Avenue, this was the location that was used between 1st December 2022 and 13th February 2023.

The sign appears to be working and has captured the whole of July 2023.

Regrettably the upward increase in the proportion of drivers speeding compared to February has continued, although outgoing traffic (that doesn't get a warning message) is slightly reduced. The detailed PDF report is all in French, due to the software being loaded onto a new PC that doesn't have an option to change the default language. I have asked Elan City to send me the English version, in the meantime parlez vous Francias?
