Warndon Parish Council SID report covering Mar for Apr 2025 Meeting

TRAFFIC ANALYSIS REPORT FOR WESTCOTEC SID

The Westcotec device has been located opposite Goodrich Avenue for vehicles heading west since 6th June 2024 but has been moved two lampposts towards Stafford Avenue, so drivers are warned sooner as the bend in the road makes drivers see the sign later.

On 1st April the reading could not be taken. The works unit will update this sign, and the readings will be included later. It means no readings during that period which is a disappointment because in the past such matters have been resolved immediately in the past.

Comparison with Previous Months (Westcotec SID)

Report	Dates Covered	Days	Veh Counts	Ave Daily Count	85th Percentile Speed mph	85th Percentile Vehicles	NB. of Speeders	Speeders % of veh counts
Hastings Drive (1a) on l/c with no number (should be no.5533?) opposite Goodrich Avenue, for vehicles heading west.

TRAFFIC ANALYSIS REPORT

TRAFFIC ANALYSIS REPORT FOR ELAN CITY SID (MILLWOOD DRIVE)

The device is located at Millwood Drive lp 7791 southbound, before Turbary Avenue. It was previously at this location in early 2024. The sign at this location encourages drivers to slow down as they head towards the Lyppards Centre with its primary school,

The sign has operated for the full month, although the first reading on this report is dated 3rd March. Slight increase last month. Around 13th March a speeder exceeded 100mph heading towards Plantation Drive which is shocking. A request has been made to move the sign so incoming traffic (facing the sign) will be northbound.

Report	Dates Covered	Days	Direction	Veh Counts	Ave Daily Count	85th Percentile Speed mph	% below 30mph	NB. of Speeders	Speeders % of veh counts
Millwood Drive lp 7791 southbound, before Turbary Avenue

TRAFFIC ANALYSIS REPORT

TRAFFIC ANALYSIS REPORT FOR ELAN CITY SID (PLANTATION DRIVE)

At last, our forth sign has been installed on Plantation Drive. Although there has been a sign here regularly, they have always been positioned to remind drivers travelling westwards. The outcoming data suggests there is a problem with drivers travelling eastbound (out of city) so for the first time the sign has been positioned on lp 0645, before Purleigh Avenue to warn drivers travelling in this direction. This location is just before a well-used footpath between the Berkeley's and the Lyppard's, a walking route towards the Lyppard Centre.

Data has been captured between 03/03/2025 and 01/04/2025 and has worked throughout the period giving 30 days data. The Incoming and Outgoing data can be compared to the data collected between July and October 2024, but the directions stated are opposite to the most recent February 2025 data.

I am surprised by the vehicle counts in my report, that over 5,000 vehicles per day are using Plantation Drive. There could be an issue with the software (possibly the data has been repeated), however the proportion of speeders is consistent with the February data. Maximum speeds in excess of 70mph are not acceptable.

Report	Dates Covered	Days	Direction	Veh Counts	Ave Daily Count	85th Percentile Speed mph	% below 30mph	NB. of Speeders	Speeders % of veh counts
Plantation Drive lp 0645, eastbound, before Purleigh Avenue
