Allotment update 6th July 2026

- Lot 16B let. There may be Great Crested Newts present, the new tenant seems to be aware of their protected status and will proceed with care, enhancing their environment if appropriate.
- We are aware of general mischief on some plots – sunflower heads being broken off and bricks moved to the middle of plots. No signs of a break in, we are aware tenant's children and dogs have been running around the site. Email to go out to all tenants reminding them of their tenancy obligations.
- New padlock purchased for the main gate.
- Consideration to be given to holding a tenant meeting to discuss the management of the site and raise any issues.
- Water meter reading sent to STWA.
